

Repositioning Family Planning: Guidelines for advocacy action

Le Repositionnement de la Planification Familiale: Directives pour actions de plaidoyer

World Health
Organization

REGIONAL OFFICE FOR Africa

USAID
FROM THE AMERICAN PEOPLE

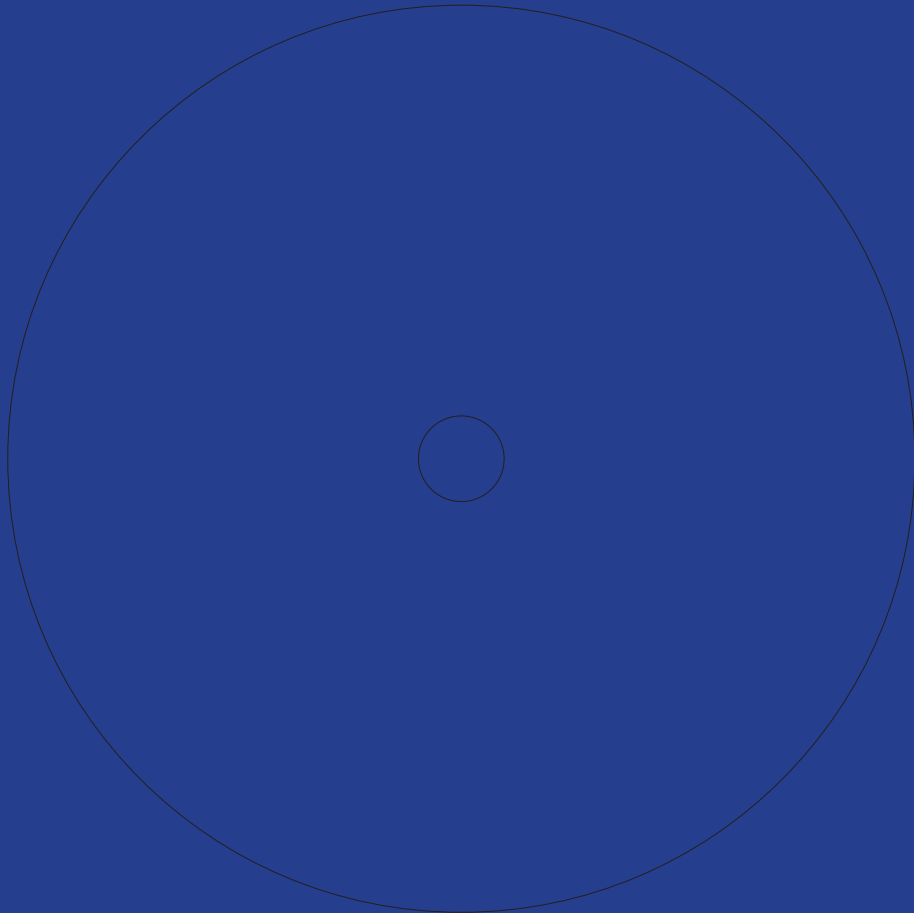

This toolkit aims to help those working in family planning across Africa to effectively advocate for renewed emphasis on family planning to enhance the visibility, availability, and quality of family planning services for increased contraceptive use and healthy timing and spacing of births, ultimately, improved quality of life across the region. It was developed in response to requests from several countries to assist them in accelerating their family planning advocacy efforts.

This toolkit was jointly produced by the World Health Organisation, Regional Office for Africa, and the United States Agency for International Development through the BRIDGE Project, implemented by the Population Reference Bureau, and Africa's Health in 2010 Project, managed by the Academy for Educational Development.

Cet outil a pour but d'aider les professionnels qui travaillent dans le cadre de la planification familiale à travers l'Afrique, afin de promouvoir efficacement une accentuation de celle-ci et aussi afin d'accroître la visibilité, la disponibilité et la qualité des services de planification familiale pour augmenter l'usage des contraceptifs, l'espacement des naissances et, en fin de compte, améliorer la qualité de vie dans la région.

Cet outil a été développé pour répondre aux demandes de plusieurs pays qui souhaiteraient de l'aide afin de promouvoir leurs efforts en faveur de la planification familiale. Ce kit a été produit en collaboration avec l'Organisation Mondiale de la Santé/le Bureau Régional pour l'Afrique et l'USAID par le biais de ses projets—BRIDGE dirigé par le Population Reference Bureau et par Africa's Health in 2010 géré par l'Academy for Educational Development.
